## Introduction

Welcome to *Connect Primary 2*. This new primary English course uses the latest methodological techniques for young learners and establishes a solid foundation on which students can build their English language knowledge. The course creates an enjoyable and engaging environment full of fun, engaging activities, in which to encourage the students' language development.

## Aims of the course

*Connect* aims to give Primary students the tools they need to develop their knowledge and use of English, and to increase their grasp of both the spoken and the written language, including basic phonetic sounds. It has a background in the cognitive-developmental theory which supports and guides children as they construct their own understanding of the world. The course also caters for the increasing English language needs of language school students who are studying multidisciplinary themes in English. The course has been developed to support teachers and students to achieve the objectives of the curriculum reform at the heart of the Egypt Vision 2030. It has been carefully designed to support whole child development: it not only supports the language development of the child, but also attends to their physical, cognitive and emotional needs. Therefore, the activities combine life skills, values, issues and challenges, and Content and Language Integrated Learning (CLIL) with songs, games, stories and projects to create a comprehensive, successful learning experience.

The units are divided into four main themes (*Who am I?, The world around me, How the world works, Communication*), encouraging the students to gradually develop their understanding of themselves, their environment and their citizenship.

## Topics

The context of *Connect Primary 2* reflects the children's environment, so the topics draw on their knowledge and subsequently challenge them to discover more about the world through English. Topics in *Connect Primary 2* include family, body parts and senses, school, sports, daily routines and healthy eating habits.

## The main characters

Hany and Hana are the main child characters. They are a brother and sister who live with their immediate family. They are also in Primary 1 and have two close friends, Amira and Youssef. The characters are learning about their environment and the world around them, so the students studying the course learn with them.

Busy Bee is a kind, wise, responsible and knowledgeable queen bee. She guides the characters as they develop and grow as individuals. She is represented throughout the course in the activity icons, which clearly show students the activity type alongside each rubric.

## Course outline

The course has the following components:

### Student's Book

The Student's Book consists of two terms. Each term has six main units plus two review units.

Each unit has an appropriate topic for young children. The lessons in each main unit include a variety of the following features:

- presentation of vocabulary in the context of an illustration
- listening and speaking practice of the target language of the unit, presented in clear contexts
- phonics presentation and practice, including listening, speaking and writing tasks
- deeper exploration of values, life skills or issues
- integrated content from other curriculum areas, such as Art, Science, Social Studies and Math
- a song to practice target vocabulary and language
- a project in which students complete a craft project and present it using the unit vocabulary
- a *Show and tell* activity
- a unit review section

The review units, which appear after each group of three units, are designed to practice and consolidate the language students have learned so far. The revision units are also an extremely useful progress check for both teachers and students, facilitating both assessment by the teacher and self-assessment by the student. Each revision unit has two lessons.

## Audio material

The Egyptian Knowledge Bank (EKB) includes all the recorded material with age-appropriate songs and stories, which have been carefully written and produced for the age group included. It is an invaluable resource and should be used as directed in the Teacher's Guide in every unit. The recorded material provides not only an accurate model of the language for the students but also a useful teaching tool, enabling you to vary the activities and pace of the lessons.

## Teacher's Guide

A full-color Teacher's Guide with every page of the Student's Book and the Activity Book inset with the accompanying notes, this comprehensive guide provides detailed lesson plans on how to teach all activities, along with suggested key teacher language. It aims to help you to get the most out of the materials you have both on the page and on the CD. Audioscripts for all the recorded material are also provided.

Each lesson begins with a lesson box highlighting objectives, vocabulary, key language and additional material required for the lesson, including any other materials that may need to be prepared beforehand.

Step-by-step teaching notes suggest how to approach the lesson. Every lesson begins with suggested *Opener* activities to revise language from previous lessons. The notes suggest many ideas about how to access previous knowledge and experiences within new topics. The activities outlined in the teaching notes can be adapted to suit students who are more confident and who are making rapid progress, or those students needing more practice and revision. There are *Fast finishers* activities and practice game suggestions at the end of each lesson.

The Teacher's Guide also provides suggestions for successful classroom management. Young Learners have limited concentration spans and particular needs. It is therefore important to vary your teaching approach to enable each individual student to participate, as well as to use group work, pair work and class work effectively.

The Teacher's Guide suggests how you can adopt a 'stop and check' approach to ensure students are confident before moving on. This approach supports the assessment of students' progress on an ongoing basis.

## Posters

There is a poster for each thematic unit, which illustrates all the main vocabulary on one large single image. The posters can be used to present and review vocabulary.

## Flash cards

To facilitate learning, flash cards are provided for all the key vocabulary in each unit. They can be used during the *Opener* activity in each lesson to present or revise language and can also be used during pair activities, role-plays and memory games. The list of flash cards necessary for each lesson is indicated in the materials section of the lesson box.

## Phonics cards

Phonics cards are provided for each of the phonic sounds presented on the course. These are full-color cards with the sound, a picture and the word of a key vocabulary item which represents this sound, for example the letter **b** with a picture of a book. They can be used as visual reinforcement to revise key sounds in matching activities and in memory or guessing games.

## Digital toolbox

Digital resources include videos of songs and stories, as well as additional factual material to support the topics in the Student's Book. Using digital materials in your lessons, alongside printed materials and realia, helps to give more variety for students. This is particularly important for Young Learners, who have short attention spans.

# Introduction

## Teacher Assessment

*Connect* has no formal assessment. This is deliberate so that students focus on enjoying English and can learn without the pressure of tests.

At the end of each unit, there is a **Teacher Assessment**, which allows you to keep track of your students' progress. This should be used to inform how you structure your lessons. Look out for problem areas that students need to practice more. You can then make sure that you revise this language in future lessons.

Teacher assessment

☐☐☐☐

To complete the assessment, take in the books at the end of the lesson. Look at the students' own assessment of their progress in the *Self Assessment* activity. Check that you agree with their own assessment and then allocate your own mark on their progress.

In order to give the appropriate grading, give students the appropriate grading for each skill based on the criteria below. Then, for each student, tick the correct colored circle in the Student's Book to represent their general progress in all the skills. You can follow the guidelines to give appropriate grades.

Make sure that students know that a tick next to a red or yellow circle is not a failure but is just a sign that they need to revise the language in this unit, and for you to improve or adapt your teaching technique.

For your own records, review the unit objectives and give each student a color according to the color coding delivered to your school.

If the student was able to achieve all of the unit objectives, and is able to use the unit's language in other contexts, tick the blue circle.

If the student was able to achieve all of the unit objectives, tick the green circle.

If the student was able to achieve most of the unit objectives, tick the yellow circle.

If the student is struggling to achieve the unit objectives, and needs more support from your side, as well as more practice, tick the red circle.

## Closing

A closing section is included at the end of each lesson to help you check for understanding and to inform you about subsequent instructions. At some point, it will help you to emphasize key language and correct misunderstanding. Closings might take several forms; they can just be quick oral reviews to summarize what your students have learned or activities like role-plays, showing how your students' performance improved.

## How to use the course

### Unit walkthrough

Each unit consists of 6 lessons and 2 Play time pages. A lesson consists of two pages in the Student's Book. Each lesson has a particular focus

### Unit opening lesson

The unit topic is introduced through a fun and realistic dialog.

The lesson works towards the children using language to express themselves

Students listen to the new words and see clear pictures of them to help their understanding. The words are written under the pictures to help students become accustomed to reading the new words

The activities are clearly shown to the students with the fun icons of Busy Bee.

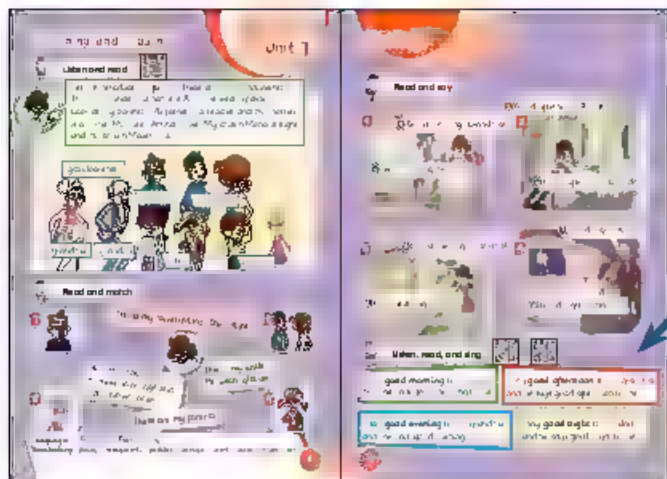

The artwork is bright and colorful with lots of details for students to find and discuss.

The language in each lesson is clearly presented to teachers and parents in the footer

# Introduction

## Vocabulary

Vocabulary is presented and practiced in a variety of ways so that the students enjoy learning. In this lesson, extra vocabulary practice is introduced with a song.

## Life skills, values and issues

Life skills, Values and Issues are integrated throughout the course, but there are also particular lessons which focus on an issue, a value or a life skill that is related to the unit topic. This lesson is about helping family so the students are encouraged to help others

The topics of the Life skills, Values and Issues pages are carefully chosen to present goals that students can achieve for themselves

## Listening and speaking / Reading and writing

This lesson shows how to practice all four language skills and gain confidence to listen, speak, read and write in English.

# Introduction

## Vocabulary

Vocabulary is practiced in fun activities such as a word search.

## Reading

Photographs show scenes that will be familiar to the students and which they can relate to their own lives

Reading passages are carefully graded and include familiar vocabulary so students can gradually build up their confidence to read longer texts.

Longer texts like this one are also recorded on the audio, so students can listen and read. This is an excellent way to improve pronunciation.

## Cross-curricular content / Speaking

Content from other areas of the curriculum, including, Math, Science, Social Studies, Art and Music, is integrated throughout the course

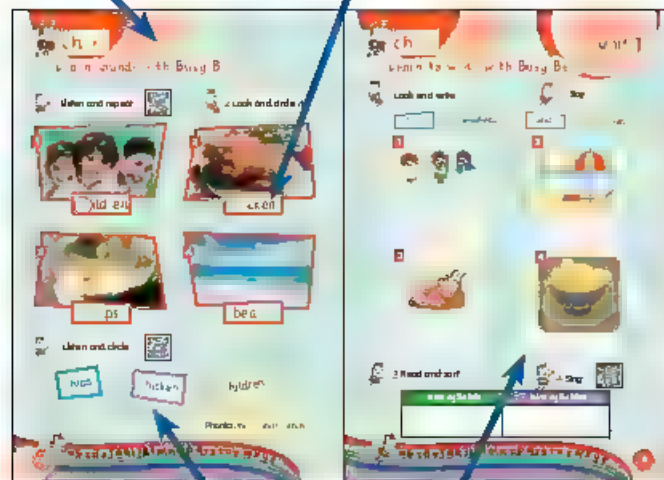

In this lesson students learn to read and analyze a basic bar chart

# Introduction

## Phonics / Handwriting

Students listen to the phonics on the EKB, which presents the target sounds and words. They listen and repeat the sounds

The letter sounds are presented within words that are known or simple and common so that students can link a new concept to familiar words and objects

Students are encouraged to listen and understand how words are formed by blending sounds. They then move on to blending sounds and forming the words themselves.

## Listening and speaking / Cross-curricular content

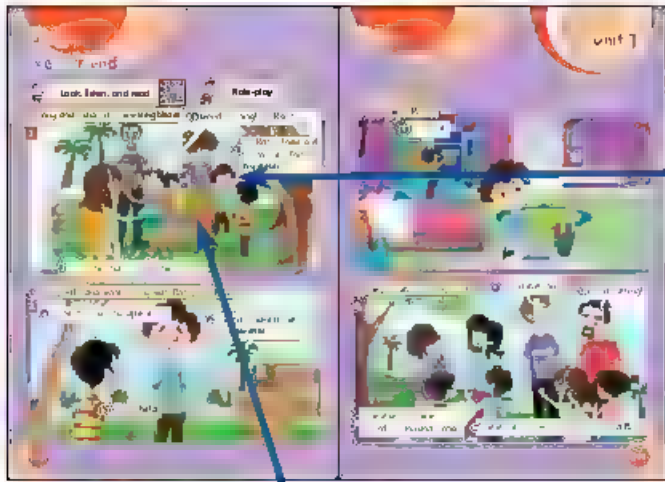

Further Math and Science practice is introduced here, as students count the number of legs on animals.

In this task, the students learn about the human and animal life stages.

## Story

Students read the newly learned vocabulary in the context of a story. This way, students learn through fun and interesting activities.

The reading texts are accompanied by bright, colorful photos which help with understanding.

## Project

Every unit includes a project. This project consolidates the language of the unit, and provides a tool for teachers to assess the students' progress in both the language and the target life skills, values and issues.

Both creativity and working in groups are important elements of the Primary 2 curriculum. Students should work together, sharing resources and cooperating with each other.

Full guidance on how to complete the project is given in the Teacher's Guide.

After completing the project, the students show their creation and talk to the class or their group.

# Introduction

## Self Assessment

Every unit ends with a Self Assessment section. This section trains students to monitor their own progress and to be able to judge their own performance according to given criteria. The Teacher's Guide suggests fun extension activities to give extra practice in any areas that need revision.

After students complete the unit, they need to think or reflect on their own performance in the areas of language skills, life skills, etc. In this way, students develop a sense of self-dependence and self-management. Students are to read the sentences in each row, and think of which level describes their performance. They then color the stars that they think best describe their work. Help students understand that this is for their own record to guide them in their own development. Students are asked to read the sentences, but students can also ask for the teacher's help to read, or ask for their shoulder partner's help to read.

The emphasis of the course is always to have fun using English as a communication tool, so lessons include plenty of speaking activities, games and puzzles.

These pages are extra material designed for students to work independently. They revise known language so can be assigned at any time. They are ideal for fast finishers.

The tasks on these pages are intended as extra practice. They include coloring, tracing, writing, matching and other fun revision activities.

The children are working more independently on these pages, so they also have a chance to develop problem solving skills.

## The communicative approach

Listening and speaking are vital language skills for communicative competence and *Connect Primary 2* offers an interesting and varied range of activities for you to present to your students. The course presents new structures and vocabulary gradually in class, group and pair work through the context of unit topics, short narratives, interactive activities and songs and games until they become a part of the students' active repertoire.

For Primary 2, the language and topics of the course remain close to the world of the student, only gradually moving out into the world beyond, and returning regularly to familiar territory. In this way, the students' learning feels relevant and personal to them and about them. The course has also been designed to complement the rest of the curriculum for Primary 2, so that vocabulary and topics are familiar.

The new structures and vocabulary introduced throughout the book are continually recycled, and detailed notes in this Teacher's Guide encourage you to use a variety of teaching methods when presenting new language. Different ways of setting up group work, pair work and whole class activities are all explained in the Teacher's Guide to ensure that students remain active and interested learners of English and to facilitate self assessment by students to monitor their continued progress.

The syllabus both develops and consolidates the skills of reading and writing. Throughout this course, short texts serve as models which are used for comprehension and writing.

The communicative approach exposes the students to a range of structures used in English, helping them to engage with meanings in English and encouraging enjoyment in using the language. It enables the teacher to set up learning activities in the classroom and provides useful classroom routines to assist the students' learning. Through the communicative approach your students will be encouraged to become active and enthusiastic learners of English.

## The role of the teacher

In the communicative classroom, you have many roles:

- 1 **Instructor** You introduce new language, give instructions to students, and decide what language and activities need to be practiced.
- 2 **Manager** You organize the classroom in order to fulfil the different activity requirements. This may involve organizing students to work in pairs or groups (see detailed notes below).
- 3 **Advisor** When students are working in pairs or groups, you move from group to group to monitor progress, help individual students with unknown words or difficulties in understanding the activity, or correcting mistakes.
- 4 **Personal tutor** You need to identify individual students' areas of difficulty and find ways of helping them.

## Preparation for teaching

Each lesson contains suggestions to help you to prepare adequately. The relevant Student's Book pages are always given at the beginning of the teaching notes and any further resources required for the lesson are listed. Always prepare by reading through the lesson notes before the lesson, making or collecting any additional resources required, so that you are fully equipped and ready to teach the lesson. You will also need to prepare listening activities involving the CD in advance.

## Teaching reading and writing skills

This course has been carefully designed to support both pre-literacy and early literacy skills in the developing child. In the emergent stage, a child is learning about print and sound as they develop oral language. This course strives to provide all the necessary resources and activities to help a child develop oral language through listening and recognition activities, songs, stories and simple dialogs.

The development of age-appropriate writing skills is also carefully introduced. Attention is given to the correct seated position for writing. Students should sit straight upright facing their desk with their feet flat on the floor in front of them. Attention is also given to the development of fine motor skills such as holding a pencil or crayon correctly. They should hold the pencil between their

# Introduction

thumb and forefinger, with the pencil resting on the third finger in a tripod grip. The thumb and forefinger should be able to move slightly – make sure students don't grip the pencil too tightly

Students are asked to trace and copy words and short phrases at first. As they build confidence and skills, they will begin to write short sentences. In the same way, reading passages gradually become longer throughout the book, so that students develop their abilities.

Encourage children to understand how writing, drawing, painting and creating things help us to communicate in our everyday lives. Create a rich and inviting environment in your classroom, with posters and classroom signs decorating the walls.

## Teaching phonics

The teaching of phonics plays an important role in developing literacy. An awareness of phonics facilitates the students' ability to discriminate between similar sounds and so develops their listening skills. In addition, learning language through phonics has been shown to develop students' spelling and consequently their writing skills, too.

*Connect Primary 2* introduces students to the basic sounds of the language through a phonic approach. The students are presented with simple consonant and vowel clusters, to build upon their knowledge of the phonic sounds of each of the letters of the alphabet. They identify the sounds in different words through lively listening activities, and then blend the letters and digraphs to spell simple words. They also practice blending and writing words through carefully graded activities.

## Teaching CLIL

CLIL (Content and Language Integrated Learning) allows us to explore more than just the language, taking children to other spheres and areas of learning through the medium of English.

In this course, the CLIL area is closely related to the theme of the unit and story content, in which areas such as Math, Art, Science and Social Studies are covered. The material included is engaging, age-appropriate and opens the door to new areas of learning around a topic. In some cases, a whole lesson is based on a related CLIL topic, and in other cases, the other topic forms a part of the lesson.

## Teaching Life skills

Children in *Primary 2* are developing and building on the life skills of primary 1 and Kindergarten. These include a wide variety of essential life skills. The curriculum framework divides Life skills into four learning dimensions:

- Coexistence skills – participation, empathy and respect of diversity. In *Connect Primary 2*, skills introduced for this dimension include participation (helping others), and respect of diversity.
- Self skills – self-management, accountability, communication, resilience. In *Connect Primary 2*, skills introduced for this dimension include building independence and self-confidence, effective listening and assessing progress. These skills are reinforced by activities such as role-plays.
- Job skills – sharing, decision making, negotiation, productivity. In *Connect Primary 2*, skills introduced for this dimension include respecting others, doing your work well and respecting rules.
- Scientific skills – critical thinking, creative thinking, problem solving. In *Connect Primary 2*, skills introduced for this dimension include problem solving, and creative thinking in project and presentation tasks. Stories, puzzles, and songs promote and develop critical thinking and problem solving skills in the classroom. The aim is to make thinking fun for the children.

The methodology is underpinned by current thinking skill trends in early years education. While learning English, specific attention should be dedicated to the development of a child's ability to recall information, ask questions, make decisions, solve problems, evaluate and organize information in addition to creating their own work. Within the materials as a whole, the students actively contribute to their own cognitive development, which helps to create confident, smart early thinkers.

## Teaching values

Values education is the teaching of values such as kindness, cooperation and independence. These values help to create good citizens and are very important development steps for children of this age.

Students are introduced to the ideas of good coexistence values by being exposed to simple values topics set in a classroom context. They are shown common situations in school life, in the context of the story and in the form of photos and a song. Through these they are guided toward behaviors such as kindness, consideration, cooperation, politeness and respect, helpfulness and increasing independence.

## Teaching issues and challenges

The curriculum framework identifies contemporary and urgent issues that are necessary at local and global levels to achieve a high quality of learning. The five major areas identified by the framework are:

- Non-discrimination issues
- Citizenship issues
- Environmental and development issues
- Health and population issues
- Issues of globalization

These issues are woven into the course where appropriate to the topic and understanding of the students. Some issues are addressed directly on the page. An example of this is the lesson about the importance of a healthy diet in Unit 6. Other issues can be introduced by the teacher if suitable for the class. Guidance is given about this in the Teacher's Guide.

## Total Physical Response (TPR)

This is a method of teaching vocabulary and concepts by using physical movement to react to the teacher's input. It is a process that can boost language learning. It is inclusive, fun and creates a sense of community in the classroom. TPR can be used as an opener at the start of the class. Simple chants with classroom instructions such as *stand up*, *sit down*, *clap your hands* and *open your books* are some of the common instructions which could be used.

TPR is also used to react to the content of songs in miming activities and guessing games.

## Using craft in the classroom

Promoting craft in the classroom is an essential part of a child's development. It develops fine-motor skills and encourages children to explore their creativity and organizational skills whilst encouraging sharing and collaboration in the classroom.

The projects on this course have been selected for their appropriacy and simplicity in terms of classroom management. The materials required are easy to attain and the tasks are manageable and engaging for children of this age.

A clear, step-by-step demonstration is required from the teacher, who should monitor carefully, helping those in need before progressing to the next stage.

Craft can also be a springboard for speaking activities, classroom displays, role-plays, songs and stories.

## Using the Games bank

Games are an essential element of effective lessons for this age group. They bring many benefits, including consolidating motor skills, developing cooperative skills, practicing vocabulary and sounds, and adding variety and enjoyment to lessons. There is a suggested game at the end of each lesson, and sometimes at the start of a lesson or for fast finishers as well, and these are clearly referenced in the teaching notes.

All the games are explained in the Games bank at the end of the book. The games practice motor skills, vocabulary and phonic sounds in an enjoyable and active way. There are a variety of whole class, group and pairwork games and they can be adapted to suit the needs of any class.

# Introduction

## Characteristics of Young Learners

Very young children by nature are very inquisitive, active learners. They need to feel safe and comfortable in their surroundings in order to progress. Ensure that your classroom is visually appealing with children's work and posters decorating the walls. If space permits, have reading corners, role-play and construction areas in order to promote pre-reading skills and learning through play and creativity. Young children are often egocentric and tend to have very short attention spans, which impacts on our choice and the length of activities. Encourage group work and sharing and tailor your activities so they are short and varied. Children of this age also need lots of positive reinforcement and praise from their teachers, who should be friendly, fair and firm.

## Techniques for teaching Young Learners

Children use imaginative play to help them make sense of the world, so as teachers we should harness this by bringing puppets and toys to the classroom. A class mascot is of great comfort to children who are reluctant to leave their family and can be used to greet and calm them in addition to explaining activities and classroom rules. A mystery bag or box with flash cards and objects inside are also valuable tools in the Young Learner's classroom and can be used to introduce new vocabulary and to capture children's attention. Children of this age learn well through doing, so ensure that all activities are meaning focused and appropriate to their stage of development.

## Ongoing assessment

It is most important for you to be aware of your students' progress throughout the year in order to stretch the more able students and keep them interested, and to encourage and give extra practice to any students who may be having difficulties.

The Closing activity suggested in the Teacher's Guide at the end of each lesson draws on and practises the material covered in the lesson, so the students' performance can serve as an indicator of their progress.

Any common problems students are experiencing should become the focus for the next lesson. For example, if students are frequently using a wrong spelling or pronunciation, focus on this in the next lesson. Individual difficulties can be dealt with by talking to the student, or by setting individual exercises which may help to improve the student's confidence. Always talk positively to students, even about their errors, to build confidence and show that we can learn through making mistakes.

Also, be aware that the students will have different skills. Reading and writing skills are more difficult for some students to master than for others. Similarly, some shy students who are reluctant to speak may be very good at reading and writing. They should all be encouraged and praised for their efforts in every skill.

## Classroom management

### Working in whole class, pairs and groups

Establishing routines in the Young Learner classroom is key to having an organized classroom and saves valuable time. Routines create a predictable pattern and once established, children begin to understand what is expected of them and how they should act. In this way we facilitate and promote meaningful learning in the classroom. Try to incorporate the following routines in your classroom:

#### Hello time

Greet the children in a friendly way. Sing or play a *Hello* song. Ask simple questions as revision, e.g. *What day is it? Is it sunny today? How old are you? What's your favorite toy?* Take the register.

#### Opener

Use the same format as above to present or revise new language or to sing a song from the previous lesson.

## **Table time**

Color-code tables and ensure that when the children move from one stage of the class to another that they do it group by group and not altogether. Ensure that the tables are uncluttered with only the materials necessary for the activity to hand.

## **Tidy up time**

Ensure that there is time at the end of the class for the children to tidy up their tables. Make sure they put away their books, crayon pots and put their chairs under the tables. Establishing a set routine for this will enable the children to become more independent as the school year progresses.

## **Goodbye time**

Use this opportunity for the children to say goodbye to you in a calm, relaxing manner.

## **Classroom language**

Classroom language needs to be simple, meaningful and repetitive. Children learn quickly, but forget easily. Use language that children can associate with a certain routine or activity, which is regularly used in class. Accompany the language with gestures until the children successfully learn the language. Be patient and consistent. Try to incorporate the following language into your English class routines:

*Come here, everyone!*

*Let's sit down!*

*Let's be quiet!*

*It's time for a story!*

## Extra practice

- Introduce yourself by saying *Good morning children. I'm Miss/Mr (name), I'm your teacher*. Students respond *Good morning, Miss/Mr (name)*.
- Speak directly to individual students and encourage *Hello, I'm (name)* in response. Also get students to introduce their partners.
- Play a game. Get students to 'Meet and Greet', going around the class and trying to make sure they speak to everyone in the class, introducing another classmate if they can. Let confident students show the others what to do. Mingle and help as necessary, but don't correct pronunciation at this stage.

### Example:

Student 1: Hello, what's your name?  
 Student 2: Hello, I'm (name),  
 Student 1: I'm (name)

- Repeat the dialog with each student. Let them choose which character to be. Building confidence and a willingness to speak is more important than students' pronunciation at this stage.

## 2 Ask and answer

- 1 Point to the first speech bubble. Encourage the class to read it out loud together. Repeat the procedure with the rest of the conversation.
- 2 Put students into groups of two and practice the short dialog in the speech bubble. Use the dialog as a basis to check recall and understanding and get pairs to go through all the characters asking and answering, taking it in turns. Remind students about the difference between *he* and *she*, and check that they are using these words correctly.
- 3 Put students into pairs to practice with all the pictures. Monitor and check all are on task and taking turns.
- 4 Ask some confident students to demonstrate the whole conversation to the class.

## STUDENT'S BOOK

- 4 Point to the first sentence and read it to the class. Students listen and point. Show a color word flash card to elicit black.
- 5 Show students how to trace with a finger, then with a pencil.
- 6 Ask students to check in pairs.

### 2 Match and color the pictures

- 1 Show students how to match the sentence to the correct picture, like the matched example.

  - Find a video on YouTube or similar of someone saying *Hello* in sign language. Show the class and point again to the second picture. Say *She can't hear, but she can talk with her hands.* Discuss with the class how we all have different things that we can and can't do.
  - Ask students to follow in their books as they listen. Play the audio and point to the characters as they speak and the other children as they are mentioned.
  - Play the audio again, sentence by sentence. Ask students to repeat the words and point to the character who is speaking each time and the other children as they are mentioned. Do this several times.

### Extra practice

- Ask students if they know the English words for any other things they can see in the picture (table, book). Tell them to point and say.
- Practice the new instructions (*Stand up/sit down*) with the whole class, and then with individual students. Begin slowly at first and make sure all students are carrying out the instructions correctly. As students grow in confidence, give the instructions faster and faster and see if the class can keep up. This is also good language to play *Teacher says* (Games bank, page 107) with.

# Unit 3

pages 32-33

<b>Objectives:</b>	To practice counting items To ask questions using <i>How many?</i> To record information on a bar chart
<b>Vocabulary:</b>	<i>pairs of boots, dresses, glasses, hats, clothes, coats, shirts, watches, clothes shop</i>
<b>Language</b>	<i>How many hats are there? There are four</i>
<b>CLIL:</b>	Math
<b>Materials:</b>	Student's Book pages 32 and 33 Class CD Dressing up clothes or flash cards: boots, dress, glasses, hat, clothes, coat, shirt, watch Flash cards: numbers 1-20, colors Colored pencils or crayons

## Opener

- Review numbers 1-20 with flash cards and also number of items around the classroom e.g. *Find 6 bags please, class!*
- Play a quick game: show a flash card with a number and ask students to tell you the next number to the one on the flash card (so if you have 4, students say 5, etc).
- Practice the items of clothing with the class. Tell the class that when you point to an item of clothing, they must name it. Begin slowly, then get faster. When the class is confident, ask individuals to name the clothing items in the same way.

## Presentation

- Do a simple addition either with flash cards or magnetic numbers if you have any. Better still, use small objects like pencils or sharpeners so students can see the *How many?* physically. Say *2 and 2, how many?* Elicit *4*.
- Practice saying *How many?* Then put either flash cards or numbers of objects around the class – 2 pens, 3 rulers, a book and ask students to look and find and tell you how many there are. A bonus point if they can give you the name of the object but the important thing is securing the concept of *How many*.
- Now, check understanding in pairs. Ask students to look in pencil cases and find some items. Then, say *How many* to their partner, asking and answering, and then swapping several times.
- Monitor and help out as needed, making sure that all have grasped the concept and are secure with both counting and number pronunciation.

## STUDENT'S BOOK

### 1 Read and match

- 1 Point to each of the items on the page and ask *What is this?* to elicit as much information as students can tell you about the pictures.
- 2 Hold up your book and point to the sentences at the bottom of the page. Read the first sentence with the class.
- 3 Elicit that the sentence matches picture 4 and show students that there is 4 written in the box as an example.
- 4 Read out the rest of the sentences or if you have confident students who are good readers let them read them out.
- 5 Get students to read the sentences and match them to the pictures, writing the picture number in the space next to the sentence.
- 6 Get students to check their answers in pairs.
- 7 Go around the classroom encouraging the students and helping where necessary.

# Unit 4

## LESSON 1

pages 52-53

<b>Objectives:</b>	To learn and identify different sports and equipment To use <i>can</i> for ability
<b>Vocabulary:</b>	<i>basketball, football, swimming, tennis, team, throw, kick, karate</i>
<b>Language:</b>	<i>Can you (play football)?</i> <i>Yes, I can./No, I can't</i> <i>I can (play tennis).</i>
<b>Materials:</b>	Student's Book pages 52 and 53 Class CD Optional outdoor space Sports flash cards or equipment: basketball, football, swimming, tennis, team, karate

### Opener

- Say *Hello* (name) to several different students to encourage the response *Hello, Miss/Mr (name)*.
- Have a quick game reviewing classroom instructions from Unit 3. Say *stand up/sit down* and get students to do the actions and say the phrases as they do. Start off slowly and get quicker, varying the pace. This is also good for revision and a change of pace between activities, especially for a restless class

### Presentation

- Teach the sports vocabulary using sports equipment or flash cards. Get students to repeat the words after you
- Then, get students to repeat and point as you say the sports equipment.
- Check understanding by mixing up the order and getting students to point and say
- Now, present the verbs. Demonstrate (*throw the ball, kick the ball, hit the ball*, etc.) either with the sports equipment or mime using flash cards. If possible, this is best done outside, using sports equipment because this will help students remember the vocabulary.
- Then, point to each item in turn and let students say the words. *What's this?* Vary the order you point to the items. Model the response for students: *I can throw a ball. Can you throw a ball?* Elicit *yes* or *no* from students.

### STUDENT'S BOOK

#### 1 Look, listen, and read

- Hold up your Student's Book, open at pages 52-53, and say *Open your books*

Unit 4

Time to play sports

1 Look, listen, and read

It's break time. The children are in the playground.

1 Can you kick the ball?

No, I can't. It's hard.

2 We can help you. We are one team.

3 Can you throw the ball?

Yes, I can. I love basketball. It's fun.

Language Can you? Yes I can./No I can't

- Ask the students to look at the pictures and name any characters they recognize (Hana, Amira, Youssef, Hany). Ask what the children are doing (playing football).
- Cup your hand behind your ear and say *Listen*.
- Explain that you are going to play the CD and ask students to follow in their books as they listen. Play the CD and point to the characters as they speak and the things they can do or play as they hear them.
- Play the CD again, line by line. Ask students to repeat the words and point to the character who is speaking each time and the sport and the things they can and can't do as they hear them.

**Narrator:** *It's break time. The children are in the playground.*  
**Hany:** *Can you kick the ball?*  
**Youssef:** *No, I can't. It's hard.*  
**Boy:** *We can help you. We are one team.*  
**Hana:** *Can you throw the ball?*  
**Amira:** *Yes, I can. I love basketball. It's fun.*

### Extra practice

- Practice the new expression *Can you...? Yes I can./No, I can't* with *throw, catch, kick*, etc. with the whole class, and then with individual students. Begin slowly at first and make sure all students understand and can mime the actions. As students grow in confidence, go faster and faster and see if the class can keep up. This is very good language to incorporate into a PE lesson.

- Ask and answer in pairs, using the photos in Exercise 1. For 'team' say *in a team*.
- Monitor and help as needed. Some pairs will need more practice than others so you could ask some to just use the first four pictures.

## Closing

- Play *I can ...* (Games bank, page 106) to revise the language of the lesson.
- Praise students for their progress.
- Say *Next, we will sing a song about sports*.

## STUDENT'S BOOK

### 1 Look and match

- 1 Pre-teach unknown vocabulary (team, karate) using flash cards and/or mime. For instance, if you know any students who are in a school team, get them to stand at the front of the class and say *team*.
- 2 Show YouTube or similar clips of karate.
- 3 Write the sports names on the board (including football, swimming, basketball, tennis) and say them for students to repeat. This will help prepare them for Exercise 1.
- 4 Hold up your Student's Book and point to Exercise 1 on page 53.
- 5 Ask what sports they can see in the photos. Help and elicit *football, swimming, tennis, basketball*. Ask them if they can see *karate* and *team*. Ask them to show you by pointing.
- 6 Now ask them to match the photos to the words. If any students are unsure, remind them of the words you put on the board earlier.
- 7 Monitor and check all can match the words and pictures with understanding.

- Call out one of the new verbs and get students to mime the action.
- Make sure everyone is joining in and knows what to do.

#### 1 Listen, read, and guess the name

- Show students page 54 and get them to find it in their books.
- Point to each of the pictures and ask *Who is it?* to elicit the character names.
- Go through the pictures asking *Can he kick the ball? (Yes), Can she hit the ball? (Yes), Is it a racket? (Yes), Can she throw the ball? (Yes), Is it a ball? (Yes)*.
- Tell students they are going to listen to the audio and point to the correct picture.
- Play the audio once, asking them to point to the pictures.
- Then, play the audio again and ask them to check.
- Play one more time to check answers. Prompt students to tell you what they hear to help decide which person it is.

### 1 Make a class survey. Ask and answer

- Using flash cards or the real sports equipment, quickly review sports (tennis/football/karate/basketball). Remind students that we play most sports but do karate.
- Review *Can you...? Yes, I can/No, I can't*. Show the flash cards and ask different students *Can you play (tennis)?* And elicit *Yes, I can/No, I can't*.
- Help students find page 55. Tell them to look at the children, then at the chart. Can they guess what they are going to do? (Talk to other students and make a class survey about sports).
- Elicit or present the different sports written in the chart.
- Show students how to tick or cross each column (say *Can you play tennis? Yes, I can/No, I can't* and tick or cross accordingly).
- Get students to mingle and ask and answer the *Can you...?* questions. Tell students to make sure they write the name of the student they are talking to, and to tick and cross each box.
- Go around the classroom as they work, monitoring and helping as necessary.
- Any students who finish quickly could add new sports and find the same students to ask.

### Extra practice

- Ask students to say what other students can and can't do. Give them an example: *Dalia can play football, tennis and basketball. She can't do karate*
- Encourage students to say who can and can't do which sport in pairs.
- Monitor and assist as needed.
- Ask a few confident pairs to demonstrate to the class.

### 2 Use the table to write sentences

- Show students the first sentence beginning and refer them to the table in the book to elicit the end of the sentence (play tennis).
- Encourage all students to write the answer to question 1 in their books.
- Then ask students to write 2 more sentences, using information from their own charts. You may need to do some examples on the board first, showing both *can* and *can't*.
- Monitor and assist as needed.

*Students' own answers*

### Practice game

- Play *Mime it* (Games bank, page 105) to consolidate the sports words.

### Closing

- Say *Well done. You sang a song. You did a survey. Next, we will learn some big numbers.*

# Games bank

## Animal name

Put a picture or flash card in each corner of the room (clear furniture a little) and split the class into 4. Give each group an animal and when you call the animal, that group should go to the correct corner and chant their animal name. Do this outside if it is too noisy for the classroom. Extend it by swapping animal names and playing again.

## Be teacher

Use calling sticks to select a student to come to the front of the class. Encourage them to be the teacher and ask the class to do something (for example *stand up, clap your hands, touch your head, write your name* etc.) When they have asked for 3 things and the class has done them, choose a different student to be teacher.

## Catch and say (1)

Use this game to practice vocabulary. You can play as a whole group or in pairs or small groups. Choose a set of vocabulary e.g. *toys*. In pairs, students throw and catch or roll a ball to each other. Each time they have the ball, they say the name of something from the unit and the group or their partner repeats. The student can then either pass the ball back to you to throw or roll to the next student or to another student who tries to think of a different word.

## Catch and say (2)

You could also build the vocabulary set by asking students to repeat all the words they have heard so far and then to add another word each time they have the ball.

## Circle it

Use this game to practice letter sounds and numbers and their formation. Draw between two and six different letters (and simple shapes or pictures if students only know one or two letters) on the board. Ask for a student to come to the board and circle and say a letter sound e.g. the letter *h* (/h/). The student comes to the board and circles the letter *h*. Repeat with other students and letter sounds.

## Color show

Use this game to practice colors vocabulary. Roll or throw a soft ball or beanbag to a student and say *Show me (yellow/red/blue/green)*. The student can touch any item in the classroom whether they know the vocabulary or not as long as it is the correct color.

## Color spot

Use this game to practice colors vocabulary. Say *Find something (red)*. Students find and point to something red in the classroom. It does not matter if they do not know the vocabulary as long as the color is correct.

## Copy it

Use this game to practice pre-writing skills. Students work in pairs. Give one student from each pair a picture of a simple line or shape. The student uses a finger to draw the line or shape on the other student's back. The second student then draws the

line or shape on paper and they see if it matches the first line or shape that was drawn.

## Dominoes

Prepare a domino template of your own for use in class. It can then be reused again and again for the particular vocabulary of the lesson. Around 12 different cards for any game is good so you may need two sheets of A4 to keep in your folder as the separate dominoes for children of this age will need to be big and chunky. See below an example with the past simple. Once you write in the relevant language, take copies of the cards so you have a set for every two students. You may want to mount the cards on cardboard and laminate them so you can use them repeatedly.

Put the students into pairs and hand out a set of cards for each. They can play on their table or on the floor, whichever you think works best for your classroom. Tell them to have the cards face down and place one in the middle face up. They should then deal out 4 cards each, which only they can see. They play the game by fitting a card either before the first card, making sure the verb forms match. Once they've played a card, they can take another one from the remaining stack. Circulate and check that everyone is playing correctly and offer help as necessary. When one of the students has used up all their cards, then they are the winner.

## Dress up

Bring in a variety of different costumes for students to try on and talk about.

## Follow the pattern

Use this game to practice motor skills and cooperative skills. In pairs, students stand at one side of the room. One student walks to the other side of the room following a meandering path. The other student follows behind. When all the students get to the other side of the room, they repeat with the other student leading.

## Go to the word or letter (1)

Use this game to practice vocabulary or letter sounds. Write words or letter sounds on pieces of paper. Place three or four of the words or letter sounds you are reviewing e.g. *h/hello, b/book, r/rabbit* and *d/daddy*, in different corners of the room. Ask the children to move around the room to music (you could play one of the songs from the unit). When the music stops, the students go to one of the letter sounds or vocabulary items before you count to three. Without looking, say one of the letter sounds or words. The students who are standing next to those words or letter sounds win that round. Play several times, making sure you use every word or letter sound.

## Go to the word or letter (2)

You could also play a version of this game with the class seated. Name three or four students and then call out one of the letter sounds or vocabulary items on the pieces of paper. The named students move to stand next to the correct word or letter. Repeat with other students until every student has had at least one turn and you have called out all the words or letter sounds.

## Guess the animal

Divide the class into 2 teams. Describe an animal to the class, giving one clue at a time. For example *It has no legs. It has no arms. It is long.* Encourage students to guess and give a point to the team that guesses correctly first.

## Guess the picture

Slowly draw a picture of a vocabulary item, e.g. *board, book, chair, crayon, pencil* or *table* for classroom objects on the board or on a piece of paper. Pause for students to guess the word. Students could play in teams, with each group trying to guess first.

## Guess the word

Put students into pairs and give them a set of cards so they have around six each. These can be copies of flash cards or other cards you may have used in previous lessons, like Domino cards. They should not show the cards to their partner. They should describe the word without saying it, so that their partner can guess what it is, e.g. *It flies in the sky, what is it?* and their partner should guess *bird*. Continue for a few turns. They could also play this in small groups. Play for a few turns.

## Guess who?

Use flash cards or the IWB (Interactive Whiteboard) of known characters/family members and do a slow reveal, getting the class to guess before the whole picture is shown. Use a timer to add urgency to the game.

## Hello!

Use this game to practice language. Ask students to sit in a circle. Say a student's name and roll a ball to that student. Help the student to say *Hello, I'm (name)*. Say *Hello, (name)* and encourage the class to join in. The student then rolls the ball to another student and the game continues in this way until all the class have taken part.

## Look and draw

Get students into two teams. Divide the board in half with your pen and ask a volunteer to come forward from each team. You have two sets of the vocabulary to be revised as prepared cards with the words on, but it must be vocabulary that can be easily drawn, e.g. *toys, parts of the body, furniture*, etc.

Ask for one person from each team to come forward and give them a card and a board pen. They cannot reveal what's on their card to their team – they should draw the word's meaning on the board and their team should try to guess what the word is (this can be done by simply shouting out the word or raising their hands – whichever you think is best). The first team to guess correctly gets a point. The game then continues with new team members

at the front. NB. Don't insist that every team member should come to the front as not everyone feels comfortable about drawing in front of others, but make sure that one team member (who might be particularly good at drawing!) doesn't dominate.

## Memory

Use this game to practice vocabulary. You need a set of real items, e.g. *a doll, a teddy bear, a robot, a balloon, a car, a ball*. Place some of the items on a table and give the students a short time to look at them. Cover the items with a cloth, and ask the students to remember the items they saw.

## Mime it

Use this game to practice vocabulary. Mime one of the vocabulary words for the class to guess, e.g. *robot*. The class says the word for your mime. You could invite a confident student to do a mime for you to guess. Students can also play in pairs.

## Mingle

Use this game to practice language. Students stand up and walk around the room. When you clap, they stop and find a partner. They do a mini-dialog with their partner, for example *Hello, what's your name? I'm (Sara)*. When you clap again, they walk around again until you signal that they should stop and do the dialog again with a new partner.

## Missing sound

Use this game to practice letter sounds. Write a list of letter sounds on the board, e.g. *h/hello, b/book* and *r/robot*, and elicit the letter sounds: */h/, /b/* and */r/*. Point to each letter sound in turn and ask students to say the sound. Then ask students to close their eyes. Remove one letter sound and ask: *What's the missing sound?* Students tell you the missing sound.

## Move it

This works very well with facial features or clothes but is pretty versatile so you could use it as a warmer with statements such as *Move if you have one sister, Move if you're six*, etc. Have the children sitting on chairs in a circle around you. If working with facial features say something like *Move if you have green eyes*. Everyone with green eyes needs to get up and move, but while they're moving you should take one chair out of the circle, so when they go to sit down, one person is unable to and is consequently out of the game. To stop that person feeling sad, bring them to the front to lead the next one, and whisper a facial feature for them to say, e.g. *Move if you have brown hair*. If working with clothes say, for example, *Move if you have a blue T-shirt*. The game continues, with you removing a chair each time and the students scrambling to sit down. Make sure there are no students getting overly excited and being aggressive towards each other at this stage. Continue, giving instructions and removing chairs until just one student remains in the game. They are then declared the winner.

## Mr. Fox

A game to practice whole hours and also mealtimes (breakfast/lunch/dinner). One child goes to the front. He/she is Mr Fox.

The rest of the class start from the other side of the room or playground. They ask *What's the time?* Mr Fox answers with a time on the hour, such as, *It's (four) o'clock*. The class do that number of steps (in this example, four steps) towards the fox. Then the class asks their question again, and again moves forward according to the time that Mr Fox says. If any child can reach Mr Fox, they become the new Mr Fox. If Mr Fox thinks that the other children are getting close, he/she can say *It's breakfast/lunch/dinner time* and then turn and chase the other children to catch someone. The child who Mr Fox catches becomes the new Mr Fox.

## Pass the letter / number

Use this game to practice letter formation. Play in groups. Students stand in groups in lines in front of the board, one behind the other. Trace a letter, for example, *h* on the back of the last student in the line. The student traces that letter on the back of the student in front of them, who then traces it on the student in front of them. They continue this until the letter reaches the student beside the board. That student writes the letter on the board. Check if it is correct. The student beside the board moves to the back of the line. Repeat the game with a different letter. You could also play this game with numbers to practice number formation.

## Point to it

Use this game to practice vocabulary when you have real items, e.g. *food (or toy food), classroom items, parts of the body, clothes*. Choose one of the vocabulary items and say *Point to a (crayon)*. Students find and point to the item.

## Point to the picture / card

Use this game to practice vocabulary using pictures of items cut out of magazines, when real items are not available, e.g. *course characters, family members, animals, numbers*. Display the cut-out pictures. Say one for the words, e.g. *daddy*. If students think they know which picture is *daddy*, they put up their hands. Choose a student to come to the board and point to the front of the classroom and point to the picture of *daddy*. That student says the next word and chooses the next student to come and point to it.

Alternatively, students could play this in pairs, using the Student's Book page.

## I can ...

Use flash cards from sports (for instance) to practice this. *I can play football/Can you play football? Yes, I can./No, I can't. Can you?* Then ask students to find 2 students who can do the same thing as they can, by asking and answering the questions.

## I have a ...

Draw a body outline on the board. Choose 1 student to come to the front of the class. Say *I have a ...* and get the rest of the class to say a part of the body. The student at the front should point to it. If they do this correctly, they can choose the next student to come to the front. You can use a stopwatch to make this more fun if your class is confident.

## Shops

Use play food to practice a shopping scenario. This reinforces food and drink vocabulary and make interactions more 'real world'. Language can be simple: *I like apples. Two apples please/Thank you*. Swap roles so everyone gets to be both shopper and shopkeeper.

## Show me

Use this game to practice numbers. Make sure each student has some real items that they know the vocabulary for, e.g. *pencils, crayons and books*. They will need enough of each item to show the numbers you are practicing. Say the number, for example: *two*. Students select and show you the correct number of items. Alternatively, they could just show the correct number of fingers when you say the number. Play this first as a class and then in pairs.

## Snap

The classic simple matching game can be used to practice all vocabulary and is very good for numbers, colors and all lexical sets and can be used to match words to pictures to make it more challenging. Versions used in Units 1-4 include:

**Color Snap:** using multiples of colors or matching colors to color words

**Number Snap:** Using multiple cards for numbers 1 to 10, simple matching or match numbers to words and use for simple addition

**Moving Snap:** Put color/number/vocabulary flash cards around the classroom. Students take a card and find a match. Good for restless classes.

**Weather Snap:** Use flash cards and weather language to play Snap.

## Sorting

Use this game to practice sorting items into different categories, e.g. *healthy and unhealthy food*. Students play in groups. Use pictures you have brought in of healthy and unhealthy foods and some reusable adhesive. Draw two circles or sections on the board. Draw a symbol for each circle, e.g. *a green spoon or green tick at the top of one side, and a red spoon or red tick at the top of the other side*. Show one of the pictures to the first group and ask them to stick it in the correct area on the board. Show the next picture to the second group. Groups get a point for each correct answer.

## Stand up if ...

Tell students to sit in their chairs but to pull them back a little from their desks. When you say a phrase that's true for them, they should stand up. If you are working with family vocabulary, say phrases like *My family is big, I have two brothers, I don't have sisters, I have three cousins*, etc. Once you have one vocabulary area you could add with some more language from earlier in the book, e.g. *I have black hair, I have brown eyes*, etc. As the game continues you could invite students, one by one, to come to the front of the class and say a phrase for the others to react to. Continue until the pace starts to drop.

## Stand up, sit down

Ask all the class to listen. Say *Stand up* and encourage them all to stand. Then say *Sit down* and encourage them to sit. Repeat, getting faster and sometimes saying the commands in a different order to check that everyone is listening carefully.

## Teacher says (1)

Use this game to practice vocabulary and language. Give instructions for the students to carry out with you. Say *Teacher says... touch your (nose)* and touch your own nose. The students touch their noses. Continue with *eye, hair, ear, mouth* and *hand*. Then say: *Touch your (nose)*, without saying *Teacher says*, and show students that you are not doing the action. Students only do the action if you say *Teacher says*.

## Teacher says (2)

You can play an adaptation of the game. Say *Touch your nose* but touch your own ear. Students say *No!* and show the correct body part by touching their own nose and saying: *Touch your nose*.

## Think of a number

To practice 10s numbers, or any new numbers you want, use flash cards and call out a number. Students point to the flash card of the number you call and get a point. Divide the class into teams and the one with most points wins.

## Tic tac toe

Draw a grid on the board, as per below

1	2	3
4	5	6
7	8	9

Divide the class into two teams – the circles (shown by 'O' on the grid) team and the crosses team (shown by X on the grid). Explain that the aim of each team is to achieve a line of their symbol going across the grid, which could be horizontally, vertically or diagonally. Tell them that when the game begins they need to choose which square, 1-9, they would like to focus on and say that you will be showing a flash card of a word from last class. If they say the word correctly then their symbol will be written into the square, but if they get the word wrong then the opposing team will have a chance to say it. You may want to ask individual members of the team at each turn, or you may allow the team members to work together to decide on the word – it's up to you, however, if you decide on the latter it makes it less likely that mistakes will be made and the outcome becomes a bit more predictable. The game continues until one team wins by creating a line of their symbols on the grid. You may like to have another two games so the final result can be decided by 'best of three'.

## Tracing letters or numbers

Use this game to practice letter or number formation. Play in pairs. One student traces a number from 1 to 5 on the back of the other student. The student says the number and then they swap roles.

## What's (Who's) missing?

Use this game to practice vocabulary. Display a set of pictures cut out of a magazine, e.g. *camel, elephant, giraffe, lion, monkey, snake*. Revise the vocabulary. Ask the students to shut their eyes, and remove one picture. Ask *What's (Who's) missing?* Confirm the answer by showing them the picture.

## What's this?

Use this game to practice vocabulary. You need a set of real items or pictures of items, e.g. *board, book, chair, crayon, pencil* and *table*. Demonstrate with a confident student. Show the student an item, e.g. a book, and ask *What's this?* Help the student to reply *It's a (book)*. Ask the class *Is it a (book)?* The rest of the group says *Yes. It's a (book)*. Swap roles, encouraging the student to hold the item and to ask you *What's this?* This time say the wrong item *It's a (board)*. Encourage the student to ask the class *Is it a (board)?* The rest of the class replies *No! It's a (book)*. Students can also play in groups.

## Word whispers

Use this game to practice vocabulary. You need pictures of vocabulary items or words or letter sounds written on pieces of paper. Students sit or stand in a line or circle. Show the first student in the line one of the words, letter sounds or pictures, e.g. *doll*, without letting the rest of the group see. The first student whispers *doll* to the student next to them, who whispers the word they have heard to the student next to them, until the word reaches the student at the end of the line or circle. He or she says the word. Students look at the pictures, words or letter sounds and see if this matches the word. If it matches, they all say the word. Students can also play this game in small groups.
